

# IN-PLANT TRAINING DESIGNED FOR YOU!

Besser offers in-plant hands-on training designed around your equipment to best fit your needs. In-plant training saves you the cost of travel expenses for each of your employees. We offer training times to accommodate your schedule, reducing production down time. We address your specific needs and give your employees an opportunity to hear the same message so improved practices can easily be implemented and accepted. We provide printed and electronic course material for future reference. All course agendas are customizable to meet your needs.

- Specific Besser Equipment Training
- Concrete Masonry Technology
- Operations Boot Camp
- Mold Maintenance & Repair
- Absolute Volume Method
- Facility Improvement & Plant Evaluation
- Costing & Inventory Management
- Predictive & Preventive Maintenance
- Leadership

We offer in-house training from as little as one-day to five-days.  
Contact us for more information on regional training held in your area.
