

CERTIFIED PRE-OWNED AND RECONDITIONED BLOCK MACHINES AND MIXERS

Two Options for Timely and Cost-Effective Machine Updates

Before and after photos of an Ultrapac concrete products machine

Certified Pre-Owned

The immediate availability of Besser Certified Pre-Owned equipment makes the decision to replace your existing block machine or mixer easier. Machines are in-stock ready to be customized to your specifications. Your downtime will be minimized since the new machine is a direct replacement for your current model. The machine can be customized with the features you select. Block machines can be outfitted with the new Advanced Servo Vibration and Servo main Drive at a cost less than buying brand new.

Existing Equipment Rebuilt

Another option is to have your existing equipment reconditioned, either in your facility or at our Alpena, Michigan manufacturing facility. In either location experienced professionals will use their skills to install new components, including electrical controls, wire bundles and overall clean-up and a new paint job. Updates will greatly improve your product quality and operational efficiency.

If the time has come to replace your current equipment a Besser Certified Pre-Owned machine or a reconditioned current machine may be your answer.

BESSER
Trusted Since 1904

BENEFITS
